Hurricane Plan

Dear Mr. Downey:

In the event of a Hurricane Warning and once the FDOT gives notice to suspend operations Superior Construction Co. will suspend all lane closures or traffic flow inhibiting activities. SCCI will monitor the storm as it approaches and will secure any items that may become airborne. SCCI will ensure all drainage systems are working and all erosion control devices are properly functioning. When the storm is imminent, SCCI will remove all unnecessary traffic control devices barrels, drums, signs, and message boards except those necessary for the safe passage of traffic. As the storm hits, SCCI will monitor the condition of the roadway for washouts and unsafe conditions when weather conditions permit. After the storm has passed, SCCI will replace all traffic control devices, repair washouts, and replace erosion control devices.

All communication leading up to and during the storm will follow the previously submitted emergency contact list.

Sincerely,
Superior Construction Company, Inc.

Brian McGarity
Project Coordinator
